

(emBrace)[™]
Every great bed begins with an emBrace.

BedArchitecture[™]
by **Knickerbocker**

Knickerbocker's emBrace collection combines elegant design with revolutionary technology to create a stunning platform for today's luxury bedding.

- **Heart of Steel**[™]

The emBrace is built with a Heart of Steel,[™] providing incredible support. Side rails and cross rails are constructed of patented steel T-rails with twice the strength of typical angle iron bed frames.

- **No Tool Assembly**

Assembly of the emBrace is amazingly easy. Components drop together right out of the box with no fasteners or tools required. Assembly takes less than one minute with no way to make a mistake. The system stays perfectly square and becomes a precise level platform.

- **Clean Design**

Contoured side rails supported by tapered legs establish the emBrace as functional and fashionable bedroom furniture. Without a cumbersome footboard, the bedroom will feel more spacious and less cluttered. Without a dust ruffle, there is more air flow and less dust collection.

- **Seat-Edge**[™] **Support**

By extending all the way to the foot of the bed, the emBrace provides superior seat-edge[™] support. This prevents foundation damage and tipping when someone sits at the end of the bed.

Available as a 7 leg Queen or a 9 leg King.

Limited Lifetime Warranty

- **No Exposed Metal**

By covering the steel with a fiberglass infused resin, the emBrace has virtually no exposed metal. It also helps reduce noise that may result from contact between a bed and a traditional metal bed frame.

- **Easyglide**[™] **Low Friction Legs**

Easyglide[™] low friction legs provide stability on hardwood floors and mobility when needed on carpeted surfaces. The greater surface area of the emBrace legs provide unmatched support and stability.

- **Made in America**

More than ever, high quality products that are Made in the USA are recognised as superior. Knickerbocker Advanced Bed Support Systems have been manufactured in the USA since 1919.

Available in White, Charcoal Black, Espresso Brown, and Gray
