TWIN LOFT BED – LIBERTY STYLE

★★★★★ 0 Reviews [Add Review](#)

This is our most common style Loft because of its strength, durability, and extra-long (XL) options. Just two compact boxes, delivered via FedEx, provide you with everything you need to put up your new loft bed quickly (except a wrench and a screwdriver). The removable front guardrail make it easy to adjust to changing needs, and the pre-assembled end panels make assembly fast and easy. Like all of our Lofts and Bunks, this one is built to last a lifetime. A great space saver/space maker! The end panels can be used as a ladder or you can purchase a ladder for side or front access.

- Twin Unfinished \$259.00
- TwinXL Unfinished \$299.00
- Twin Golden Oak \$329.00
- Twin XL Golden Oak \$369.00

Solid Wood Twin Loft Bed Frame

What's So Great about This Loft Bed Frame Compared to Others?

We specialize in **lofts**, **bunks** and **futon bunks**, and we offer models that are built with traditional yet sophisticated techniques to ensure superior strength and longevity.

The Liberty Loft is well liked because of its **Solid Construction** and **Ease of Shipping**. Some of our other models, like the **Spirit Loft**, are a kit style loft (that means the end panels are put together by you) so they require a fair amount assembly. The trade off is that they are slightly less expensive than other models. Comparatively, this twin loft bed is partially pre-assembled (the end panels are already in one piece when it arrives to you), so it can be assembled quickly and easily. The layered construction makes this loft super strong and durable (the crossbars are built into the upright layers that make up the corner posts).

Like all of our loft options, you don't need a ladder. Some people prefer a **ladder**, but the ends are definitely strong enough for repeated daily climbing. Older kids don't seem to mind skipping a ladder, where littler kids seems to appreciate one on their tender feet. And, the loft alone can handle 1000 pounds, so we feel pretty confident it will hold up to the expected wear and tear.

In addition to a Regular Twin Size, it is offered in an **Extra Long Size**, giving you 80 Inches of length in the mattress area verses 75 like the regular twin. Tall people are always happy about this option, and of course we have **Twin Extra Long Mattresses** if you need them. Furthering the functionality and value, if in the future you need to convert from standard Twin to Twin XL (or vice versa), you can buy a conversion kit and you'd then have a re-usable loft bed in an alternate size without having to totally reinvest.

The Liberty Loft comes standard with a full length guard rail (see our **Freedom Model** if you prefer a partial/half guard rail)

This Twin Loft Bed can be ordered Unfinished (with nothing at all applied to it), OR it can be ordered with a Water Based Stain in Golden Oak Color. Of course we use a LOW VOC, water-based stain, and the staining process will add some additional time to your order vs. unfinished.

(Any futon mattresses or covers shown in the images are NOT included for this price)

Mattress Considerations

We recommend using an 8 Inch mattress or less. The area that the mattress will drop into is approximately 12-13 Inches. To get the maximum effectiveness from the guard rail, you'll want to be sure it will protrude above the mattress by 4-5 Inches. Basic style mattresses are usually 7-8 Inches high, and some people opt to use a futon mattress since they are commonly offered in that thickness (and the **futon mattresses** can be FedEx'd, where **conventional mattresses** usually cannot be). You decide what's best for you. A Bunkie board, box spring or foundation is not used for this loft; It comes with a 12-slat kit that drops right into the frame to support the mattress you choose.

NOTE: These are recommendations; you'll want to decide what's appropriate and comfortable for you

Other Items You Might Like

This Liberty style loft is also available as **bunkbed**, and it too can be ordered in **extra long**. Of course we have tons of other **lofts** and **bunks** (including **over-sized options**). And don't forget about our super versatile **futon bunks**.

Check out our Complete Selections of **Nightstands**, **Dressers** and **Mattresses** for even more ideas.

Made in Central PA by a mission-driven, values-focused, health-conscious company.
